Prologue	1
Part I: Foundations	11
1 Introduction	13
1.1 Combinatorial Problems	13
1.2 Two Prototypical Combinatorial Problems	16
1.3 Computational Complexity	23
In Depth: Some Advanced Concepts in Computational Complexity	29
1.4 Search Paradigms	31
1.5 Stochastic Local Search	37
In Depth: Randomness and Probabilistic Computation	52
1.6 Further Readings and Related Work	54
1.7 Summary	55
Exercises	56
2 SLS Methods	61
2.1 Iterative Improvement (Revisited)	61
2.2 ‘Simple’ SLS Methods	71
2.3 Hybrid SLS Methods	85
2.4 Population-Based SLS Methods	95
2.5 Further Readings and Related Work	105
2.6 Summary	108
Exercises	111
3 Generalised Local Search Machines	113
3.1 The Basic GLSM Model	113
In Depth: Formal Definition of GLSM Semantics	119
3.2 State, Transition and Machine Types	122
3.3 Modelling SLS Methods Using GLSMs	131
3.4 Extensions of the Basic GLSM Model	138
3.5 Further Readings and Related Work	142
3.6 Summary	144
Exercises	145

4	Empirical Analysis of SLS Algorithms	149
4.1	Las Vegas Algorithms	149
	In Depth: Probabilistic Approximate Completeness and 'Convergence'	155
4.2	Run-Time Distributions	158
4.3	RTD-Based Analysis of LVA Behaviour	171
	In Depth: Benchmark Sets	176
4.4	Characterising and Improving LVA Behaviour	184
4.5	Further Readings and Related Work	198
4.6	Summary	200
	Exercises	201
5	Search Space Structure and SLS Performance	203
5.1	Fundamental Search Space Properties	203
5.2	Search Landscapes and Local Minima	209
5.3	Fitness-Distance Correlation	220
5.4	Ruggedness	226
	In Depth: <i>NK</i> -Landscapes	231
5.5	Plateaus	235
5.6	Barriers and Basins	243
5.7	Further Readings and Related Work	249
5.8	Summary	250
	Exercises	252
	Part II: Applications	255
6	Propositional Satisfiability and Constraint Satisfaction	257
6.1	The Satisfiability Problem	257
6.2	The GSAT Architecture	267
	In Depth: Efficiently Implementing GSAT	271
6.3	The WalkSAT Architecture	273
6.4	Dynamic Local Search Algorithms for SAT	284
6.5	Constraint Satisfaction Problems	292
6.6	SLS Algorithms for CSPs	299
6.7	Further Readings and Related Work	306
6.8	Summary	308
	Exercises	310
7	MAX-SAT and MAX-CSP	313
7.1	The MAX-SAT Problem	313
7.2	SLS Algorithms for MAX-SAT	321
	In Depth: Efficient Evaluation of <i>k</i> -Flip Neighbourhoods for MAX-SAT	336
7.3	SLS Algorithms for MAX-CSP	340

7.4	Further Readings and Related Work	350
7.5	Summary	352
	Exercises	354
8	Travelling Salesman Problems	357
8.1	TSP Applications and Benchmark Instances	357
8.2	'Simple' SLS Algorithms for the TSP	367
	In Depth: Efficiently Implementing SLS Algorithms for the TSP	382
8.3	Iterated Local Search Algorithms for the TSP	384
8.4	Population-Based SLS Algorithms for the TSP	399
8.5	Further Readings and Related Work	410
8.6	Summary	413
	Exercises	414
9	Scheduling Problems	417
9.1	Models and General Considerations	417
9.2	Single Machine Scheduling	426
	In Depth: Details of Dynasearch for the SMTWTP	437
9.3	Flow Shop Scheduling	438
	In Depth: Neighbourhood Restrictions in TS-NS-PFSP	448
9.4	Group Shop Problems	449
9.5	Further Readings and Related Work	460
9.6	Summary	463
	Exercises	464
10	Other Combinatorial Problems	467
10.1	Graph Colouring	468
10.2	The Quadratic Assignment Problem	477
10.3	Set Covering	488
10.4	Combinatorial Auctions	498
10.5	DNA Code Design	507
10.6	Further Readings and Related Work	517
10.7	Summary	520
	Exercises	523
	Epilogue	527
	Glossary	537
	Bibliography	575
	Index	633
